-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

## **DETAILED ACTION**

### ***Claim Objections***

1. Claims 4-10 are objected to because of the following informalities: These claims depend from cancelled claims. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Barbut et al (US 5662671) in view of Barry (US 5439446). Barbut discloses a method of trapping and excising plaque from the aorta including the steps of making an incision in the aorta, introducing the distal end of a catheter through the incision, expanding a filter, contracting the filter, and removing the cannula and captured embolic material from the aorta (Col. 21, line 40 – Col. 22, line 10).

4. Claim 3 differs from Barbut in calling for the steps of expanding and contracting an occluder. Barry teaches a method for treating a vessel wall comprising the steps of positioning an occluder upstream of an occlusion, expanding the occluder to stop blood

flow through the vessel and contracting the occluder to allow for the site to be treated without the flow of blood through the vessel (Col. 12, lines 45-53). Therefore, it would have been obvious to one of ordinary skill in the art at the time of invention to modify the method of Barbut to include the step of expanding and contracting an occluder as taught by Barry so that the vessel can be treated without the flow of blood therethrough.

### ***Conclusion***
